

CANMAKER BEDLINER INFORMATION SHEET

SAVE UP TO \$300,000

10 YEARS

METAL BELT LIFE

Flat Wire Belting

Plastic Bed Liner

Steel Bed

Eliminate metal-to-metal contact with a **Plastic Bed Liner**. This material is resistant to chemicals, wear, and high temperatures. Ideal with your proven stainless steel flat wire belting.

Adding a Plastic Bed Liner in a can washer can **extend belt life to 10 years or more**, and can **eliminate bed replacement entirely**.

Over 10 years, a Plastic Bed Liner can save up to **\$300,000** in bed and belt replacement costs, with an **ROI in as little as 8 months**.

ASHWORTH'S PLASTIC BED LINERS CAN EXTEND BELT LIFE UP TO A DECADE OR LONGER

Can washers constructed with metal belts that ride directly on metal beds are prone to deterioration due to persistent metal-on-metal contact that occurs during operation.

By installing a plastic bed liner from Ashworth Bros., Inc., companies can eliminate the need for bed replacement and extend belt life up to a decade or longer.

A new metal bed can cost as much as \$50,000. To avoid the high-cost, companies turn to Ashworth's plastic bed liners.

Ashworth bed liners are made from the same engineered plastics used in our plastic hold-down mats for can washer systems that are highly resistant to chemicals, high temperatures, wear and tear.

The combination of a metal belt and plastic liner can cost less than half the cost of a plastic belt.

ADVANTAGES OF METAL BELT/PLASTIC LINER VERSUS PLASTIC BELTING

- Industry standard/universal sprockets/off-the-shelf availability
- Eliminates metal-on-metal friction and wear
- Cheaper than plastic belting
- Extends metal belt life
- Material is readily available
- Provides a more thorough can washing process
- Produces less chemical carry-out
- Higher durability, more damage resistant
- Lower costs for repairs and replacement parts

ASHWORTH OFFERS LOWER COST OF OWNERSHIP

- Easy to maintain and upkeep
- Easy to replace and repair
- Readily available - industry standard materials
- Lower running cost
- Lower investment cost
