

INNOVATIVE SOLUTIONS FOR OUTDATED TECHNOLOGY

FACTORY SERVICE CONTROL PANEL

Avoid the frustration and expense of unplanned downtime! Waiting to replace obsolete components is costly—you need a plan! Ashworth Factory Service can help you budget and replace aging components with modern technology. Our highly experienced Factory Service Team has the expertise to design and install a state-of-the-art control panel solution that is tailored to meet the specific needs of spiral systems across a wide range of food processing industries.

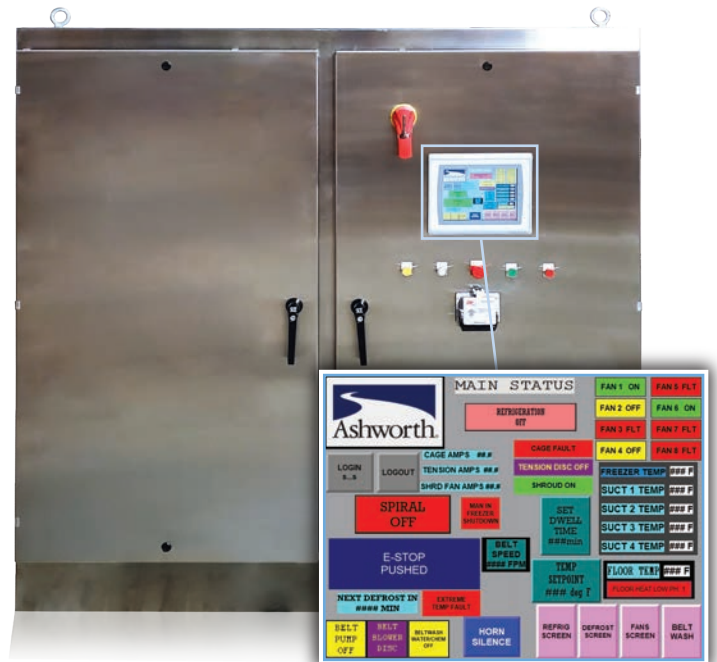

Our customers rely on Ashworth's Factory Service Control Panel to provide easy-to-use touchscreen technology combined with programmable software to replace outdated control panels on their existing spiral equipment.

When it comes to implementing control panels for spiral systems, Ashworth's knowledge of industry standards and programming expertise is unmatched by our competitors. If your aging control panels have spaghetti wiring, obsolete components, and a decades-old interface, Ashworth can rapidly replace outdated systems with a Factory Service Control Panel.

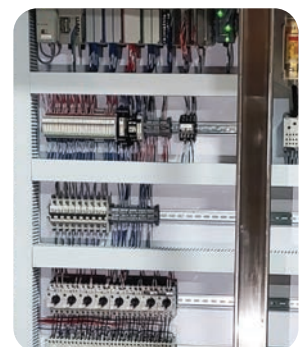

FACTORY SERVICE CONTROL PANEL AT A GLANCE:

- Industry leading automation components from Allen-Bradley
- Components include programmable logic controllers (PLCs), Human Machine Interfaces (HMIs), Variable Frequency Drive (VFDs), and refrigeration control systems
- NEMA enclosures that are built to endure harsh conditions
- Waterproof, corrosion-resistant, and color-coded control panel displays
